Concrete Manufacturers

WE MANUFACTURE AND SUPPLY EMERGENCY WATER STORAGE TANKS WITH STUBS FACTORY INSTALLED FOR FIREFIGHTING PURPOSES

CONCRETE WATER TANKS

Concrete water tanks are an excellent choice for emergency water storage due to their strength, durability, and resistance to environmental conditions. Their robust construction makes them particularly suitable for firefighting applications.

We offer factory-installed firefighting stubs, allowing for straightforward on-site connection to Marte hose fittings or threaded fittings (to be supplied and installed by others on site).

It is essential to confirm all required specifications with the appropriate local authorities, including the New Zealand Fire Service, your local Council, and your project Engineer. We also recommend consulting with your local plumber or drainlayer to ensure compliance with all relevant standards and installation requirements.

STUB OPTIONS AVAILABLE

Installation of 4"/102mm 316 Stainless steel pipe stubs for easy connection of 100mm flexible hose. We offer two types of stubs for this application, plain or threaded.

OPTION ONE - STAINLESS STEEL PLAIN PIPE STUBS

Plain Pipe Stubs for use with 4"/102mm ID Flexible Hose

Balance Hose / Pipe = 4"/102mm is a reinforced, flexible hose (Marte or similar) suitable for potable (drinking) water which may be buried below ground level.

Marte hose/pipe is available from HCD Flow Technology branches.

OPTION TWO - STAINLESS STEEL THREADED PIPE STUBS

Threaded Pipe Stubs for use with 4"/114mm Threaded pipe fittings or similar.

Pipe specification is 4"/114mm OD e.g. schedule pipe or similar threaded to BSP specification.

All site connections of plain pipe stubs to flexible balance pipe or threaded pipe stubs to threaded fittings by others on site.
