

WARRANTY TERMS AND CONDITIONS

All Bowers & Son Ltd products are warranted to be free from manufacturing defects and non-compliance with applicable industry standards for a period of ten (10) years from the date of purchase. This warranty is offered only to the original purchaser.

Conditions of Warranty:

Bowers & Son Ltd accept no liability for damage caused due to improper site preparation and incorrect site situations that are outside our requirements and recommendations. Refer to site preparation steps 1-3 on page 3.

Liability of Bowers & Son Ltd is limited to the repair, or if necessary, replacement of the concrete tank concerned. The decision to repair or replace the tank lies exclusively with Bowers & Son Ltd.

Preparation of the tank site is the responsibility of the purchaser or their agent.

This warranty does not cover:

- Damage caused after delivery resulting from poor, incorrect or inadequate site preparations.
- Tanks that are not placed directly on a prepared tank site at the time of delivery
- Filling of the tank with water past the overflow point before the overflow pipe is fitted.
- Blocked or incorrectly installed overflow pipe. This includes backlog of groundwater from full soakage pits and the overflow pipe not being installed to drain away from the tank base.
- Installation of partially buried tanks exceeding maximum ground levels as per the specifications.
- Tanks that are unequally buried that have greater differential of more than 1m from highest to lowest point.
- Moving the tank from its original location.
- Undermining of the ground supporting the tank in any way.
- Tanks that are painted a dark colour which attracts heat, causing the temperature differential between the inside and outside of the tank to increase. ·LRV = 45% or greater. LRV (light reflectance value) please refer to paint manufacturers guides.
- Failure of plumbing or drainage connections installed by others after delivery
- Quality of water entering the tank from roof catchment and the effect this water has on the concrete inside the tank.
- Normal aging, wear and tear.
- Negligent and accidental damage that occurs after delivery and/or during installation.
- Failure resulting from natural causes (earthquakes, flooding etc.) See PS1 available on request.
- Repairs carried out by unauthorised persons.
- Use of a tank for purposes other than for which it was originally intended.
- Exceeding of the load capacity on concrete manhole lid.
- Hydraulic Uplift (Floatation).
- Flood wash tanks

If you have any further queries regarding your site, delivery of your tank, or require further information on concrete water storage tanks, please feel free to contact us.
